

Cushion Extreme®

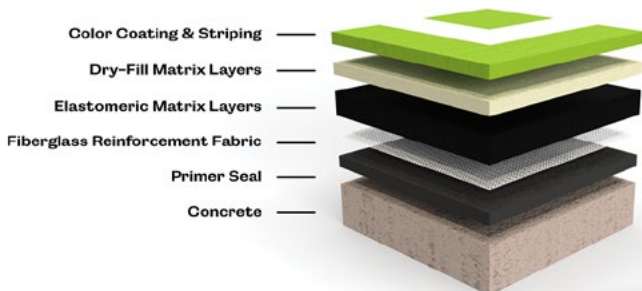

When your court has Cushion Extreme®, you will experience a new level of cushioned court comfort. You can play harder and longer with less fatigue.

Our product's base pad is coated with a proven world-class hard court acrylic tennis and pickleball court surfacing system. The tennis ball and pickleball play and react as if it were on a hard court, but your body enjoys the built-in resilience of our cushioned base pad. Experience maximum playing comfort and add years to your game with a Cushion Extreme® surface on your court.

Your knees, joints, and back will thank you when playing on a Cushion Extreme®-covered court. Our product brings an incredible level of cushioned comfort to the games of tennis and pickleball. No wonder this unique, seamless, resilient, poured-in-place system is quickly becoming the preferred surface of homeowners, clubs, and champions everywhere. It truly is a proven winner from coast to coast! It's good for your game and the environment.

Just how "cushiony" is it? Don't get us wrong—you won't be playing on marshmallows! Cushion Extreme® is noticeable, yet it's subtle. It's twice the cushion as the courts at the US Open, yet the playability is virtually the same. See for yourself!
